Comment_description: Subject: United Water's excessive 17.9% proposed rate increase!

As a concerned Boise senior citizen, I am asking the the PUC 'deny' United Water's request for such a large increase in their rates. With inflation running about 3-5%, the 17.9% request is too excessive! United Water should put together a long-range conservation plan and operating strategy that might incorporate ideas such as the ones listed below:

- + Actively work with contractors on using low water landscaping for lawns/trees, gray water, etc. especially in new construction.
- + Construct a model home or display of some type that showcases the latest technology for water conservation and low water landscaping. Maybe a joint venture with Idaho Power! The model home could be open to the general public, contractors, and also for school children field trips.
- + Develop better planning for incorporating impact fees to offset the cost for new wells and infrastructure for new subdivisions or construction.

+

Comment_description: I think we have had enough rate raises to last us quite awhile. It's not affordable now in the summer time. Especially people on fixed incomes. It would be nice if we were billed monthly too.
