Comment_description: I oppose the 18% rate increase proposed by United Water. I feel its more a responsibility of the stock holders, dividend rate, executive compensation to invest in infrastructure rather than the consumer who is already penalized by increased summer rates. Also, the developers should pay impact fees to cover their community needs. Thanks

Comment_description: I received your notice regarding your ridiculous request to increased rates by 17.91%. What was this notice dated February 13, 2006 and I just got it in the mail on April 22nd?

Your request is dumbfounded and you need to make developers pay for this. I am sick and tired of being priced out of my home!!!

You need to make new home owners, developers, new businesses - pay for this!

We have a ton of water this year and you are squeezing every last bit of money people have!

How can anyone keep up with your increases!!! We're getting priced right out of our homes - I've done everything to cut costs!

You need to come up with a better solution then to just make us pay and pay and pay!
