Re: United Water rate increase

June 2, 2006

To the IPUC

Having received notice of another request from United Water for a yet another rate increase, it is my opinion that the company is just trying to amend the IPUC's final order from last year, when there full request was only partially approved, to try and receive the amount that they were denied last year through this redundant claim.

It is my request that the Commission deny the water companies request in it's entirely at this time.

Sincerely

Martin Bettwieser
