Please describe your comment briefly:

United Water is applying for a rate increase that would raise the average residential customer's annual bill from \$343 to \$395. This represents 15.21% increase. Although it has been 3 years since the last granted rate increase, this still comes to over 5%/year, well above the rate of inflation. I believe this request is excessive and given the current state of the economy should be denied.
