Please describe your comment briefly:

The proposed increased rate by United Water is unacceptable. They got a rate increase 3 years ago and should at least wait for 2 more years before a request. Do not grant them this increase.

Please describe your comment briefly:

Due to the current economic state of deflation, I find it wrong to increase these rates. Although the company has invested to replace aging infrastructure, they need to take into account the personal lives this effect and those who have become unemployed or are strapped because of the economic downturn. Water is a basic necessity and at this time, the rates should not be raised. After the economy begins to turn around, which is predicted about the beginning 2012, then they should go for the increase.
