To: All IPUC Members

I believe a 19.9% rate increase borders on the obscene. One primary reason for this increase is reduced usage. Penalizing the public for behavior that is environmentally positive is the wrong message. Also, a request of this size is completely out of proportion with the current economics of the Boise Valley. United Water needs to do belt tightening just like the rest of us have had to do over and over and over again. Please say NO to this huge increase that is not affordable on anyone's budget today or next year.

Sincerely,
Lynn Risky

I am against the 19.9% rate increase that United Water is asking for. Their current rates are already too high! During the summer months my average water bill is \$350.00. My last bill was \$250.00 for two months. That was for Aug.and Sept. I have family living in other states that are much bigger than ours, and they pay an average of \$40.00 a year for water. How can water cost so much? Also, I don't see the need to upgrade their current computer billing system. The old one seemed to work just fine! I don't see how that is going to benefit the customer.

Thank you

Please describe your comment briefly:

I am not pleased that they are asking a rate increase. It seems counter to the efforts to get the economy off the ground again here. For years they have encouraged us to conserve and do xeriscape etc. now we are being punished for that? I understand the need to rebuild and create new infrastructure. If that is the real reason for the rate increase they need to do a better job of explaining that need. Nobody has more money to expend these days.
