United Water expands territory in east Boise

United Water Idaho, which serves much of the city of Boise, is expanding its service territory to include two residential subdivisions east of Harris Ranch.

The Idaho Public Utilities Commission approved two applications from United Water to add the east Boise subdivisions of Brighton Land Holdings LLC, with about 89 service connections, and Eastvalley Subdivision with about 110 service connections.

United Water, which serves about 85,600 customers, has the capability to provide the service without the construction of special facilities beyond extending water mains.

A full text of the commission's order, along with other documents related to this case, is available on the commission's Web site at www.puc.idaho.gov. Click on "Open Cases" under the "Water" heading and scroll down to Case Numbers UWI-W-13-01 and UWI-W-13-02.
