Boise Idaho, 83713

Name of Utility Company: United Water Idaho Acknowledge public record: True

Comment: I am concerned about the request by United Water for another increase. This company is constantly requesting increases. Every year we have a surcharge for water use in the summer. Last year they had a large campaign to inform the public about water conservation. Then when customers conserved water they requested another increase because people were not using enough water. I am a Senior Citizen with a limited income. Social Security only gives us an increase every few years that barely meets cost of living increases. This cannot continue.

Name of Utility Company: United Water Idaho Acknowledge public record: True

Comment: I understand that Utilities are "guaranteed" a rate of return, however, in the current economical environment, (even though the Federal Government says that we are all doing a lot better) if you are retired and on a fixed income, you haven't seen a 13% increase in years. And for many, there is no increase in a Pension, and in many cases the there is a reduction because of the Federal effects on health care and health insurance. Some of us have just quit going to see doctors and dentists. It would be nice if we could just stop using water, but the body is kind of fickle about that.  
If a rate increase is going to be approved, how about making it less than 10%?
