Name of Utility Company: United Water
Acknowledge public record: False

Comment: My wife and I are officially elderly. We try to live frugally. We shower occasionally and do our laundry in super loads. Our dishwasher runs only at full load. Half our 1/3 acre property lies fallow. Still, our water bills are running 150-200 bucks per month. When we bought this house in 1992, and the water company Idaho (not French) owned water bills were under \$10.

Comes now another request for another 13% increase, raising the "average" bill to \$434.61. What demographic can we get into where our water bill becomes \$32 per month?

My granny used to say "figures don't lie, but liars figure". Using "average" comes pretty close.

I suggest that the PUC institute a cap of, say, \$80 for any monthly bill. And meanwhile, deny this request in its entirety.

Yours truly
Frank Gunderson

Comment: United Water is requesting an overall rate increase of 13.2% to cover investments and increased operating costs. Much of the investments seem due to growth and therefore should be covered in the increased revenue due to an expanded customer base. Operating expenses should not be going up that much since energy costs have been decreasing over the last several years.

I urge the PUC to deny United Water's request for a rate increase or at least decrease the amount. Given the fairly low rate of inflation over many years I would have thought an increase of 4% to 6% would be more reasonable.

Sincerely,

Eric R. Munz
