**3.4 Calculation of Distance**

For services which are distance sensitive, usage charges are based on the airline distance between the serving wire center locations associated with the originating and terminating points of the call.

The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the serving wire centers as defined by Telcordia, in the following manner:

- Step 1:** Obtain the "V" and "H" coordinates for the serving wire center of the Customer's switch and the destination point.
- Step 2:** Obtain the difference between the "V" coordinates of each of the Rate Centers. Obtain the Difference between the "H" coordinates.
- Step 3:** Square the differences obtained in Step 2.
- Step 4:** Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5:** Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6:** Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating serving wire centers of the call.

**Formula:**

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

**7.26 AmeriVision Debit Card Service**

(M)

The AmeriVision Debit Card allows customers to pay a fixed dollar amount in advance for long distance calling over AmeriVision's network. Customers use an "800" number for access from touch tone phones. Customers can place domestic and international direct dial calls using the service. Cards are decremented for each minute or fractional minute of use as set forth below. As calls are placed, charges for the call are deducted on a real-time basis until the full amount of the card is exhausted. Customers will be notified in advance of the exhaustion of the card. An expiration date, if applicable, is printed on the card. The rates paid by the customer until the card is exhausted are the rates in effect at the time the card is purchased. Debit Card accounts may be replenished at the rates specified for replenished cards.

The following types of calls may not be completed using the AmeriVision Debit Card:

- \* calls to 700, 800, and 900 numbers
- \* calls to directory assistance
- \* operator assisted calls
- \* conference calls
- \* calls requiring time and/or charges

The AmeriVision Debit Card is available twenty-four hours a day, seven days a week. The cards will be offered to customers on a first serve basis and may be offered in conjunction with other AmeriVision products. An AmeriVision Debit Card account is established upon receipt of payment by the Company. When an account is established, the Company will assign an Account Code/Authorization Code to the account. The Company reserves the right to determine the acceptable types of payment.

Service is provided and each account is debited at the following rate. Fractional minute calls are rounded up to the nearest full minute:

<b>Card Type 1:</b>	\$0.30 per minute
<b>Card Type 2:</b>	\$0.35 per minute
<b>Card Type 3:</b>	\$0.20 per minute
