TARIFF FORMAT

A. Sheet Numbering: Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between pages 11 and 12 would be page 11.1.

B. Sheet Revision Numbers: Revision numbers also appear in the upper right corner of each sheet where applicable. These numbers are used to indicate the most current page version on file with the Commission. For example, 4th Revised Sheet 13 cancels 3rd Revised Sheet 13. Consult the Check Sheet for the sheets currently in effect.

C. Paragraph Numbering Sequence: There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.
- 2.1
- 2.1.1
- 2.1.1.A
- 2.1.1.A.1
- 2.1.1.A.1.(a)
- 2.1.1.A.1.(a).I
- 2.1.1.A.1.(a).I.(i)
- 2.1.1.A.1.(a).I.(i).(1)

D. Check Sheets: When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff, with a cross reference to the current Revision Number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some sheets). The tariff user should refer to the latest Check Sheet to find out if a particular sheet is the most current on Commission file.

Any person who uses IDT's service to make 1+ calls who does not have a current account with IDT, including the following:

SECTION 2. RULES AND REGULATIONS

2.1 Undertaking of the Company

This tariff contains the regulations and rates applicable to intrastate resale telecommunications services provided by IDT America for telecommunications between points within the State of Idaho. Resale services are furnished subject to the availability of facilities and subject to the terms and conditions of this tariff in compliance with limitations set forth in the Commission's rules. The Company's services are provided on a statewide basis and are not intended to be limited geographically. The Company offers service to all those who desire to purchase service from the Company consistent with all of the provisions of this tariff. Customers interested in the Company's services shall file a service application with the Company which fully identifies the Customer, the services requested and other information requested by the Company. The Company reserves the right to examine the credit record and check the references of all applicants and Customers prior to accepting the service order. The service application shall not in itself obligate the Company to provide services or to continue to provide service if a later check of applicant's credit record is, in the opinion of the Company, contrary to the best interest of the Company. The Company may act as the Customer's agent for ordering access connection facilities provided by other carriers or entities when authorized by the Customer, to allow connection of a Customer's location to a service provided by the Company. The Customer shall be responsible for all charges due for such service arrangement. The Company does not own any switching, transmission or other physical facilities in Idaho.

SECTION 3 - DESCRIPTION OF SERVICE

3.1 Computation of Charges

3.1.1 The total charge for each completed call may be a variable measured charge dependent on the location of the termination point of the call. The variable measured charge is specified as a rate per minute which is applied to each minute. 1+ Dialing and 800/888 Service calls are measured in thirty-second increments. All Prepaid Calling Cards, Rechargeable Calling Cards and Travel Cards are measured in one (1) minute increments. All calls are rounded up to the next whole increment. (C)

3.1.2 Where mileage bands appear in a rate table, rates for all calls are based upon the airline distance between the originating and terminating points of the call, as determined by the vertical and horizontal coordinates associated with the exchange (the area code and three digit central office code) associated with the originated and terminating numbers. If the Customer obtains access to the Company's network by a dedicated access circuit, that circuit will be assigned an exchange for rating purposes based upon the Customer's main telephone number at the location where the dedicated access circuit terminates. The vertical and horizontal (V&H) coordinates for each exchange and the airline distance between them will be determined according to the V&H Coordinate table contained in AT&T's FCC Tariff No. 10 which is incorporated herein by reference.

SECTION 3. DESCRIPTION OF SERVICE (Cont'd)

3.1 Computation of Charges (Cont'd)

3.1.3 Timing begins when the called station is answered and two way communication is possible, as determined by standard industry methods generally in use for ascertaining answer, including hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. Recognition of answer supervision is the responsibility of the Underlying Carrier. Timing for each call ends when either party hangs up. IDT America will not bill for uncompleted calls.

3.2 Customer Complaints and/or Billing Disputes

Customer inquiries or complaints regarding service or accounting may be made in writing or by telephone to the Company at:

294 State Street  
Hackensack, NJ 07601  
1-800-691-8438

Any objection to billed charges should be reported promptly to IDT America. Adjustments to Customers' bills shall be made to the extent that records are available and/or circumstances exist which reasonably indicate that such charges are not in accordance with approved rates or that an adjustment may otherwise be appropriate. Where overbilling of a subscriber occurs, due either to Company or subscriber error, no liability exists which will require the Company to pay any interest, dividend or other compensation on the amount overbilled. These procedures will not supersede the Commission's Telephone Customer Relations Rules, IDAPA Section 31.41.01, Rules 203 and 204.

If a Customer accumulates more than One Hundred Dollars (\$100.00) of undisputed delinquent IDT America 800 Service charges, the IDT America Resp. Org. reserves the right not to honor that Customer's request for a Resp. Org. change until such undisputed charges are paid in full.

SECTION 3 - DESCRIPTION OF SERVICE (Cont'd)

3.5.4 Prepaid Calling Cards

This service permits the use of the Company's Prepaid Local Access Number Cards and 800 Debit Cards ("Prepaid Calling Cards") for placing calls. Customers may purchase Prepaid Calling Cards at a variety of retail outlets or through other distribution channels. These Cards are available in face values of \$5.00, \$10.00, and \$20.00 and are non-refundable.

Prepaid Calling Cards are accessed using a local access number or toll-free telephone number printed on the card. The caller is prompted by an automated voice response system to enter his/her Authorization Code and then to enter the terminating telephone number. The Company's processor tracks the call duration on a real time basis to determine the cost consumed. The total consumed cost for each call is deducted from the remaining balance on the Customer's Card.

All calls must be charged against a Card that has a sufficient balance. These Cards are not rechargeable, and all calls will be interrupted when the balance on the cards reaches zero. Prepaid Calling Cards are billed in full-minute increments. Cardholders may dial another telephone number while using the card by depressing the pound (#) button and entering in the new telephone number.

SECTION 3 - DESCRIPTION OF SERVICE (Cont'd)

3.5 Service Offerings (cont'd)

3.5.9 Rechargeable Calling Card

The Company's Rechargeable Calling Card is a telephone service that allows Customers to obtain a predetermined amount of access to the Company's telephone services. The card is a dollar-based service, meaning that there is a fixed amount of dollars (i.e., \$25, \$100, or \$200) available to the Customer who purchases a card.

A Customer may purchase a Rechargeable Calling Card with a credit card in which the Customer has the option of choosing to allow for the automatic recharge of the Rechargeable Calling Card. If automatic recharging is selected, the Rechargeable Calling Card will be recharged at a balance predesignated by the Customer. A Customer may also purchase Rechargeable Calling Cards that are not automatically recharged, and calls will be interrupted when the balance on such cards reaches zero.

Rechargeable Calling Card service is offered via domestic toll-free access numbers and is available to a cardholder from a touchtone phone. The Cardholder dials a domestic toll-free number. The Cardholder hears recorded messages that guide the Cardholder through the Platform. The Platform validates the Cardholder's PIN, determines whether sufficient time or value remains on the card and, if so, completes the call to the called telephone number dialed by the Cardholder. The Cardholder is verbally informed of the available balance of the Rechargeable Calling Card account.

Calls are real-time rated during call progression. Rechargeable Calling Cards are billed full-minute increments. Rechargeable Calling Cards are billed at the same rates twenty-four (24) hours a day, 365 days a year. The total price of each call, including applicable taxes, is calculated based on the value of the card purchased and is deducted from the available account balance associated with each Rechargeable Calling Card. The Cardholder receives a warning in accordance with the rate per call destination one minute before the balance reaches zero. Calls in progress will be terminated when there is an insufficient balance to continue the call.
