3 for \$5 Feature Packages: Features marked with "♦" are available for 3 for \$5.00 in lieu of other feature discounts.

Customers enrolling with an 18, 36 or 60 month term will be able to select the 3 for \$5 feature option. Under this option, a Customer may select up to 3 eligible features per lien for \$5.00. If a Customer chooses to select only one feature on any line and the current price of that feature is less than \$5.00, the current price will apply. Only one 3 for \$5 option can be applied per line. If the Customer has more than 3 features on a line, additional features will be charged at their ala carte rates. Eligible features under the 3 for \$5 options are marked with "♦". **Effective January 19, 2006, this feature package is only available to customers where their service is provided via McLeodUSA local switching platform.**

Features (cont'd)

Advantage Feature Package 2001A

If the following requirements are met, the customer is a "qualifying customer" for purposes of this feature package:

a. The customer must have selected McLeodUSA as its presubscribed carrier for local, interLATA, intraLATA, and international services, and must enter into a 60-month agreement for these services on or after May 1, 2001; and

b. The customer must purchase at least one data product (Web hosting, dial-up internet, or DSL) from McLeodUSA, at the same time the term agreement for voices services is entered into.

Qualifying customers who subscribe to Caller ID (Number Only) or Caller ID (Name and Number) service will receive a credit at least equal to the monthly price of the Caller ID option received, for each of the first three months of service. This offer is limited to areas where the local, long distance, Caller ID, and data services mentioned above are available.

Boise, Idaho

6.9 Prepaid Debit Card (from section 6.2.5 of the LD Tariff, beginning on page 43)
Customers may purchase a McLeodUSA prepaid debit card either directly from McLeodUSA or from a third party vendor which will permit the customer to dial into a McLeodUSA 800 number (identified on the back of the call card), the called telephone number and a personal identification number ("PIN"). A prepaid debit card processing unit will determine whether the prepaid calling is valid, and if so, the remaining minutes of use for the card. Upon verification that minutes of use remain, the prepaid debit card unit originates the second call to the called party, at which point conversation time begins. Customers are not entitled refunds for unused minutes. Alternative Prepaid Debit Card Pricing may be available through an ICB arrangement based on individualized needs of the purchaser.

In addition to the rates listed below, there is an additional fee of \$0.10 per calling card, plus \$0.03 per card with a "scratch off" PIN concealment feature. The standard payphone surcharge applies to all prepaid debit card calls placed from pay telephones.

6.15 Long Distance Services (6.15.1 and 2 moved from Page No. 85.2)

(M)

6.15.1 Business Preferred AdvantageSM Inter/Intra State Long Distance for Customers without McLeodUSA Local Service.

This service is available to business customers that do not purchase a bundled package of local and long distance service from McLeodUSA. Intrastate rates will be applied to any call record where the originating ANI is not provided by the customer or the originating carrier. These rates are based on an expected ratio of at least 80% of Customer's long distance minutes in a given month terminating to an RBOC end-user and no more than 20% of the LD minutes terminating to non-RBOC end-users. If more than 20% of Customer's total long distance call minutes in a month terminate to non-RBOC end users, then an additional charge of \$0.025/minute will be added for those Customer's long distance minutes in excess of the permitted 20% non-RBOC termination.

Per Minute Usage Rate: \$0.1664

6.15.2. Business Preferred AdvantageSM Inter/Intra State Long Distance for Customers with Local Service Provided by a McLeodUSA.

This service is available to a Customer that purchases a bundled package of Preferred AdvantageSM local and long distance voice service for all lines at a Customer physical location. Intrastate rates will be applied to any call record where the originating ANI is not provided by the customer or the originating carrier. These rates are based on an expected ratio of at least 80% of Customer's long distance minutes in a given month terminating to an RBOC end-user and no more than 20% of the LD minutes terminating to non-RBOC end users. If more than 20% of Customer's total long distance call minutes in a month terminate to non-RBOC end users, then an additional charge of \$0.025/minute will be added for those long distance minutes in excess of the permitted 20% non-RBOC termination.

6.16 Rate Table 5.1.2 Business Preferred AdvantageSM Inter/Intra State Switched Toll Free Service (Moved from Page No. 87.01 and 87.1)

(M)

This is a switched Toll Free service that is available to business customers that do not purchase a bundled package of Preferred AdvantageSM local and long distance voice service for a physical location. Intrastate rates will be applied to any call record where the originating ANI is not provided by the customer or the originating carrier. These rates are based on an expected ratio of at least 80% of Customer's long distance inbound minutes in a given month originating from an RBOC end-user and no more than 20% of the LD minutes originating from non-RBOC end-users. If more than 20% of Customer's total long distance call minutes in a month originate from non-RBOC end users, then an additional charge of \$0.025/minute will be added for those long distance minutes in excess of the permitted 20% non-RBOC origination. This toll free service is not available for any locations outside of the continental United States. All incoming toll free calls will be rounded and billed in 6-second increments. Toll Free features include: listing of Customer's toll free number in the national Toll Free directory service; message referral that provides a disconnect or referral message on the toll free number; ability to restrict areas of service; geographical routing that permits multiple destinations of Toll Free based on NPA of the caller; time routing that permits customer to set multiple destination numbers based on time specifications; percent allocation routing that permits routing of calls to multiple destinations based on a percentage distribution; and route advance overflow that allow for a secondary target termination for overflow.

Toll Free Directory Assistance: \$15.00/number
Route Advance: \$20.00

Effective August 17, 2006, the Premium Preferred Package (Package B) is no longer available to new customers.

6.19 Residential Local Service Packages (Moved from Sheet Nos. 51, 76, 77, 118, 119, 120 and 121)

A Descriptions

Residential Package B - Premium Preferred® Package
 Residential Package B consists of local line switched service, Call Waiting, Three Way Calling, Call Forward Variable, Caller ID, Anonymous Call Rejection, Call Waiting ID, 900 Blocking, Last Call Return, Continuous Redial, Call Screening, Speed Call 8 and a Primary Directory Listing.

B Rates

A Local Line Price Adjustment surcharge of \$4.00 is applied to each residential local line that was established prior to June 13, 2005 and is serviced out of a Resale CLLI (see Section 6.19(C)).

Residential Packages in Idaho North Rate Group 1	
	Monthly Rate
Premium Preferred® Package	\$46.90

(I)

Residential Packages in Idaho North Rate Group 2	
	Monthly Rate
Premium Preferred® Package	\$46.90

(I)

The rates above are the recurring monthly rate for local service provided via McLeodUSA Switch. An additional surcharge or credit may apply to this monthly rate if McLeodUSA uses another service delivery platform (Network Elements or Resale) to provide service to customers served in a particular RBOC Central Office where service via McLeodUSA Switch is not available. The specific price for each Business Package in each CLLI in which McLeodUSA offers local service is set forth in Section 6.19(C).

6.0 Grandfathered Services/Products (cont'd)6.22 Long Distance and Toll Free Packages - Business (Moved from Page Nos. 62, 62.1, 62.2, 84, 85, 85.1, 85.2, 85.3, 85.4, 85.5, 87, 87.01, 87.1, 87.2)**Effective February 18, 2008, these Business Long Distance and Toll Free packages are for existing customers of record at existing locations, and are no longer available to new customers.**A. Descriptions

McLeodUSA long distance services are interexchange telephone services that allow customers to originate and terminate interexchange calls at locations within the state of Idaho. A Customer must select McLeodUSA as their primary interexchange carrier for both Interstate and Intrastate long Distance. With the exception of Preferred Advantage® long distance services, usage charges are based on the duration and time of day of each call when applicable. Where Customer's local service is provided by McLeodUSA, McLeodUSA offers reduced long distance pricing on a nondiscriminatory basis provided all Customer's local lines at a Customer location are served by McLeodUSA. Intrastate rates will be applied to any call record where the originating ANI is not provided by the customer or the originating carrier.

Long Distance Preferred Advantage® Packages consist of a bucket anytime minutes used by the Customer for both incoming and outgoing domestic long distance calls. Long distance minutes used in excess of the bucket of minutes shall be billed at the "overage rate per minute." Preferred Advantage® Inter/Intrastate Plan Plus is available to Business Customers.

Preferred Advantage® Dedicated Long Distance Plus provides dedicated outbound 1+ long distance services for business customers that bill over 50,000 minutes of long distance usage (*i.e.*, both inbound and outbound Long Distance) per month per and purchase more than \$500 per month in telecommunications services from McLeodUSA. A direct connection must be established with the McLeodUSA network via a Dedicated Access Line (DAL).

Preferred Advantage® Flat Rate Long Distance provides switched outbound 1+ long distance at one per minute rate for calls placed at any time of day.

Preferred Advantage® Long Distance Plus provides switched outbound 1+ long distance to business customers with at least \$50.00 estimated monthly usage for long distance and toll free services, including conference calling, calling card and international long distance usage.

Time of DayDay Time Period

7:00 am through 6:59 pm Monday through Friday;

Evening/Weekend Time Period

7:00 pm through 6:59 am Monday through Friday, all day Saturday and Sunday.

Holidays Rates

Holiday rates are applicable from 12:00:00 am to 11:59:59 pm on the following holidays: New Years Day; Martin Luther King Junior's Day; Presidents Day; Memorial Day; Independence Day; Labor Day; Columbus Day; Veterans Day; Thanksgiving Day; Christmas Day.

6.0 Grandfathered Services/Products (cont'd)

6.22 Long Distance and Toll Free Packages - Business (cont'd)

A. Descriptions (cont'd)

McLeodUSA Preferred Advantage® 800 services are inward WATS services that permit intrastate calls to a customer's station in one location from stations in diverse geographical locations, and for which the McLeodUSA customer is billed for the calls rather than the call's originator. Unless otherwise specified, all McLeodUSA 800 calls are subject to a 30-second average connect time (i.e., total monthly minutes of use divided by total monthly calls must equal at least 30 seconds) for a given terminating service group. All calls are rounded up to the next higher increment. In the event that 800 calls do not meet the 30-second average connect time requirement, billable usage will be increased by a surcharge equal to the necessary number of minutes at the average cost per minute to meet the 30-second requirement. In addition, Customers may also order Originating ANI Sorting, which provides the Customer with a detailed monthly analysis of the originating telephone numbers of those placing 800 calls. A Customer must select McLeodUSA as their primary interexchange carrier for both Interstate and Intrastate long Distance. With the exception of Preferred Advantage® toll Free services, usage charges are based on the duration and time of day of each call when applicable. Where Customer's local service is provided by McLeodUSA, McLeodUSA offers reduced long distance pricing on a nondiscriminatory basis provided all Customer's local lines at a Customer location are served by McLeodUSA.

Preferred Advantage® Inter/Intrastate Toll Free Plus is available to business Customers that subscribe to Preferred Advantage® Inter/Intrastate Plan Plus.

Preferred Advantage® Dedicated Toll Free Plus provides dedicated inbound long distance services for business customers that bill over 50,000 minutes of long distance usage (i.e., both inbound and outbound Long Distance) per month per and purchase more than \$500 per month in telecommunications services from McLeodUSA. A direct connection must be established with the McLeodUSA network via a Dedicated Access Line (DAL).

Preferred Advantage® Business Flat Rate Toll Free provides switched inbound 1+ long distance service for business customers at one per minute rate for calls placed at any time of day. A monthly recurring charge will be assessed per Toll Free number. This service is only available to customers subscribing to Preferred Advantage® Business Flat Rate Long Distance. Preferred Advantage® Toll Free Plus provides switched inbound 1+ long distance service to business customers with at least \$50.00 estimated monthly usage for long distance and toll free services, including conference calling, calling card and international long distance. This service is only available to customers subscribing to Preferred Advantage® Long Distance Plus.

McLeodUSA Telecommunications Services, Inc. d/b/a PAETEC Business Services (Acceptance Stamp)

6.0 Grandfathered Services/Products (cont'd)

6.22 Long Distance and Toll Free Packages - Business (cont'd)

B. Rates

McLeodUSA long distance services are interexchange telephone services that allow customers to originate calls from their telephone line and terminate calls to domestic (intrastate and interstate) and international points. All long distance calls will be recorded and all calls billed using the Overage Rate minutes will be billed in 6 second increments for business customers. All residential long distance calls will be recorded and billed in one-minute increments. All lines at a customer location must be PIC'ed to McLeodUSA for long distance service. Intrastate rates will be applied to any call record where the originating ANI is not provided by the customer or the originating carrier.

The long distance service minutes included in the Preferred Advantage® Long Distance Packages apply to domestic intrastate calls, and to domestic interstate and to international calls as specified by McLeodUSA pursuant to federal regulation. Long Distance Packages exclude toll free, calling card, conference calling, and international usage. Customers not subscribing to a long distance package shall pay the overage rate per minute for all calls. Customers using more than the number of minutes in their selected long distance package for that particular location shall be charged a per minute overage rate for each minute of long distance usage in excess of the total minutes in the selected long distance package. For example, if a Business Customer has selected a 1,000 anytime LD minute package at Location A, and that Customer uses 1,005 minutes of long distance services in July at Location A, then the Customer's August invoice will reflect an additional usage sensitive charge for the 5 minutes of overage long distance usage billed at the overage rate/minute set forth below. Customers may increase or decrease the size of their long distance package once a month without a non-recurring charge after having service for a minimum of ninety days. Any changes will become effective with the following billing cycle.

Preferred Advantage® Inter/Intrastate Plan Plus provides switched outbound 1+ long distance services for Business Customers.

Preferred Advantage® Dedicated Long Distance Plus provides dedicated outbound 1+ long distance services for business customers that bill over 50,000 minutes of long distance usage (*i.e.*, both inbound and outbound Long Distance) per month per and purchase more than \$500 per month in telecommunications services from McLeodUSA. A direct connection must be established with the McLeodUSA network via a Dedicated Access Line (DAL).

Preferred Advantage® Flat Rate Long Distance provides switched outbound 1+ long distance at one per minute rate for calls placed at any time of day. Residential customers may choose between a usage rate service without a monthly fee or a reduced usage rate service with a monthly fee.

Preferred Advantage® Long Distance Plus provides switched outbound 1+ long distance to business customers with at least \$50.00 estimated monthly usage for long distance and toll free services, including conference calling, calling card and international long distance usage. A "LDPromo Shortfall Charge" equal to the difference between actual usage and \$50.00 will be assessed monthly, if applicable.

6.22 Long Distance and Toll Free Packages - Business (cont'd)

B. Rates (cont'd)

Preferred Advantage® Dedicated Long Distance Plus

This service is available to business customers that bill over 50,000 minutes of long distance usage per month (*i.e.*, both inbound and outbound Long Distance) and purchase more than \$500 per month in telecommunications services from McLeodUSA. A direct connection with the McLeodUSA network via a Dedicated Access Line (DAL) is required. DALs are either connected to a McLeodUSA switch or provided via an alternative vendor. This service can be provided where necessary facilities are available. This product is available for multiple locations, however, the monthly rates may vary due to state locations.

Pricing is based on per minute rates that incorporate the origination, transport and final termination of the customer's call. Calls are billed in 6-second increments, with a 6-second minimum. Customer will be subject to an additional port charge of \$500 in any month in which Customer's total monthly long distance usage is less than 50,000 minutes. A recurring charge will also be assessed for the DAL circuit.

Intrastate rates will be applied to any call record where the originating ANI is not provided by the customer or originating carrier. Long Distance rates for Preferred Advantage® Dedicated Long Distance service require that a customer maintain an acceptable traffic distribution on its outgoing and incoming Long Distance calls. The total minutes of Long Distance calls must originate or terminate at least 70% of the time from or to end user customers located in a local exchange in which a Regional Bell Operating Company ("RBOC") is the incumbent Local provider. McLeodUSA has the right to switch customer to a different LD plan and provide service on a month-to-month arrangement when any customer's Long Distance terminates less than 70% of the time to a LEC providing local service in an RBOC exchange.

Account Codes are available to provide customers auditing functionality for all long distance calls.

Per Minute Usage Rate: \$0.0507

B. Rates (cont'd)

Preferred Advantage® Inter/Intrastate Plan Plus

Intrastate rates will be applied to any call record where the originating ANI is not provided by the customer or the originating carrier. Long Distance rates for Preferred Advantage® Inter/Intra State Switched Long Distance service require that a customer maintain an acceptable traffic distribution on its outgoing and incoming Long Distance calls. The total minutes of Long Distance calls must originate or terminate at least 70% of the time from or to end user customers located in a local exchange in which a Regional Bell Operating Company ("RBOC") is the incumbent Local provider. McLeodUSA has th right to switch customer to a different LD plan and provide service on a month-to-month arrangement when any customer's Long Distance terminates less than 70% of the time to a LEC providing local service in an RBOC exchange.

Customers Without Local Service

This service is available to business customers that do not purchase a bundled package of Preferred Advantage® local and long distance service from McLeodUSA.

Per Minute Usage Rate: \$0.1110

Customers With Local Service

This service is available to a Customer that purchases a bundled package of Preferred Advantage® local and long distance voice service for all lines at a Customer physical location.

Per Minute Usage Rate: \$0.0948

Preferred Advantage® Long Distance Plus

This is a switched outbound 1+ long distance service for business customers with at least \$50.00 estimated monthly usage for long distance and toll free services, including conference calling usage, calling card usage and international long distance usage. For every month in which Customer's actual long distance and toll free usage charges, including conference calling, calling card and international long distance, is less than \$50.00, Customer will be assessed a "LD Promo Shortfall Charge" equal to the difference between actual usage and \$50.00.

Long Distance rates for Preferred Advantage® Switched Long Distance services require that a customer maintain an acceptable traffic distribution on its outgoing and incoming Long Distance calls. The total minutes of Long Distance calls must originate or terminate at least 70% of the time from or to end user customers located in a local exchange in which a Regional Bell Operating Company ("RBOC") is the incumbent Local provider. McLeodUSA has th right to switch customer to a different LD plan and provide service on a month-to-month arrangement when any customer's Long Distance terminates less than 70% of the time to a LEC providing local service in an RBOC exchange.

Customers without Local Service: \$0.1004 per minute
Customers with Local Service: \$0.0507 per minute

B. Rates (cont'd)

Preferred Advantage® Dedicated Toll Free Plus

This is a dedicated Toll Free service that is available to business customers that bill over 50,000 minutes of long distance usage per month and purchase more than \$500 per month in telecommunications services from McLeodUSA. A direct connection with the McLeodUSA network via a Dedicated Access Line (DAL) is required. DALs are either connected to a McLeodUSA switch or provided via an alternative vendor. This service can be provided where necessary facilities are available. This product is available for multiple locations, however, the monthly rates may vary due to state locations.

Pricing is based on per minute rates that incorporate the origination, transport and final termination of the customers' call. Calls are billed in 6-second increments, with a 6-second minimum. Customer will be subject to an additional port charge of \$500 in any month in which Customer's total monthly long distance usage is less than 50,000 minutes. A recurring charge will also be assessed for the DAL circuit.

Intrastate rates will be applied to any call record where the originating ANI is not provided by the customer or the originating carrier. Long Distance rates for Preferred Advantage® Dedicated Toll Free services require that a customer maintain an acceptable traffic distribution on its outgoing and incoming Long Distance calls. The total minutes of Long Distance calls must originate or terminate at least 70% of the time from or to end user customers located in a local exchange in which a Regional Bell Operating Company ("RBOC") is the incumbent Local provider. McLeodUSA has the right to switch customer to a different LD plan and provide service on a month-to-month arrangement when any customer's Long Distance terminates less than 70% of the time to a LEC providing local service in an RBOC exchange. This toll free service is not available for any locations outside of the continental United States. Tailored Call Coverage and Route Overflow are available features.

Per Minute Usage Rate: \$0.0689

Preferred Advantage® Inter/Intrastate Toll Free Plus™

This is a switched Toll Free service that is available to business customers that do not purchase a bundled package of Preferred Advantage® local and long distance voice service for a physical location. Intrastate rates will be applied to any call record where the originating ANI is not provided by the customer or the originating carrier. Long Distance rates for Preferred Advantage® Inter/Intra State Switched Long Distance, Switched Toll Free services, and Dedicated Long Distance service require that a customer maintain an acceptable traffic distribution on its outgoing and incoming Long Distance calls. The total minutes of Long Distance calls must originate or terminate at least 70% of the time from or to end user customers located in a local exchange in which a Regional Bell Operating Company ("RBOC") is the incumbent Local provider. McLeodUSA has the right to switch customer to a different LD plan and provide service on a month-to-month arrangement when any customer's Long Distance terminates less than 70% of the time to a LEC providing local service in an RBOC exchange. This toll free service is not available for any locations outside of the continental United States. All incoming toll free calls will be rounded and billed in 6-second increments. Toll Free features include: listing of Customer's toll free number in the national Toll Free directory service; message referral that provides a disconnect or referral message on the toll free number; ability to restrict areas of service; geographical routing that permits multiple destinations of Toll Free based on NPA of the caller; time routing that permits customer to set multiple destination numbers based on time specifications; percent allocation routing that permits routing of calls to multiple destinations based on a percentage distribution; and route advance overflow that allow for a secondary target termination for overflow.

6.23 Account Service Fee and Access Recovery Surcharge (moved from pages 36, 67.1 and 67.2)

Effective January 1, 2009, these fees are no longer applicable to new customers.

An Account Service Fee will be applied to bills that do not meet a minimum 'total current charges'. See Account Service Fee listed **below** for the applicable rates. Also, an Access Recovery Surcharge, which is used to offset increased costs associated with gaining access to incumbent networks, will be assessed monthly. This fee is not a tax or charge imposed by a government entity. The ARS is based on the percentage of the total monthly recurring charges. See Access Recovery Surcharge listed **below** for the applicable rates.

(M)
(T)
(T)

Account Service Fee

Residential: \$2.99 per account Business: \$4.99 per account

The monthly Account Service Fee is assessed on accounts each month when the "total current charges" are below \$10.00 for the month.

Access Recovery Surcharge:

The Access Recovery Surcharge (ARS) is not a fixed monthly recurring charge. Rather, the ARS is a percentage of the customer bill based on the total amount spent on services, less any taxes, surcharges or other non-qualifying fees. This fee is used to offset increased McLeodUSA expenses caused by a regulatory change. Specifically, the charge will recover the costs related to recent increases in our costs of gaining access to incumbent networks. This fee is not a tax or charge imposed by a government entity. The ARS is calculated by application of a percentage to each customer's total monthly recurring charges for all services (MRC). The ARS percentage to be applied will be determined by the customer's total MRCs on its monthly invoice, based on the schedule outlined below.

Customer Account Monthly Recurring ARS	
<u>MRC Revenue Tier</u>	<u>Charge %</u>
\$0.00 to \$200.00	10.00%
\$200.01 to \$400.00	9.00%
\$400.01 to \$500.00	8.00%
\$500.01 to \$1000.00	5.00%
\$1,000.01 to \$1,500.00	4.00%
\$1,500.01 to \$2,500.00	3.00%
\$2,500.01 to Unlimited	0.00%

6.24 Local Business Services (moved from Pages 50, 50.1, 50.2, 56, 57, 72, 73, 74, 80, 88, 89, 91, 92, 93, 94, 95, 96, 99, 99.1, 99.2, 99.3, 99.5, 99.6, 99.7, 99.8, 113, 114, 115, 116 and 117)

Effective January 1, 2009, these services are no longer available to new customers or to existing customers at new locations. Existing customers will be able to request changes to services, provided the request does not conflict with state rules, regulations or laws.

A. Descriptions

Business Package A - OneLine PreferredSM Package

Business Package A consists of local line switched service and a Primary Directory Listing.

Business Package C - Premium Preferred[@] Package

Business Package C consists of local line switched service, Call Waiting, Three Way Calling, Call Forward Variable/Busy/Don't Answer, Called ID, Anonymous Call Rejection, Call Waiting ID, Speed Call 30, Call Transfer, Remote Access Call Forwarding and a Primary Directory Listing.

Business Package F - Preferred Advantage[@] Plus Package

Existing Customers currently subscribing to grandfathered non-Preferred Advantage products are eligible to subscribe to Preferred AdvantageSM Plus ("PA Plus ") local line packages when renewing their service agreement with McLeodUSA by executing the Preferred Advantage agreement. PA Plus packages may include substitute or alternative line features currently purchased by the Customer that will permit them to migrate to a Preferred AdvantageSM service agreement with little or no modification to the Customer's current service configuration. Each Preferred AdvantageSM Plus local package will be priced at the same rate as the standard Preferred Advantage local package with a comparable number or type of features.

Business Package G - Simple Preferred[@] Select Package

Business Package G consists of local line switched service, Wire Care*, and a choice of three (3) of the following features: Call Waiting, Call Waiting ID, Caller ID Name and Number, Call Forward Variable, Call Forward Busy, Call Forward Don't Answer, Call Transfer, Anonymous Call Rejection, Call Screening, Continuous Redial, Basic Hunting, Last Call Return/Callback, Remote Access to Call Forward, Speed Call 30 and Three Way Calling.

Business Package H - Value Preferred[@] Select Package

Business Package H consists of local line switched service, Wire Care*, and a choice of seven (7) of the following features: Basic Voice Mail, Call Waiting, Call Waiting ID, Caller ID Name and Number, Call Forward Variable, Call Forward Busy, Call Forward Don't Answer, Call Transfer, Anonymous Call Rejection, Call Screening, Continuous Redial, Basic Hunting, Last Call Return/Callback, Remote Access to Call Forward, Speed Call 30 and Three Way Calling.

Note: Some features may not be available in all areas.

* Asterisk denotes non-regulated services.

Business Package I - Preferred Advantage® Unlimited

Business Package I consists of local line switched service, and a choice of any of the following features: Basic Voice Mail*, Call Waiting, Call Waiting ID, Caller ID Name and Number, Call Forward Variable, Call Forward Busy, Call Forward Don't Answer, Call Transfer, Anonymous Call Rejection, Call Screening, Continuous Redial, Basic Hunting, Last Call Return/Callback, Remote Access to Call Forward, Priority Call, Speed Call 30 and Three Way Calling. This package is only available when combined with the Unlimited Long Distance and no other long distance plans are available with this Business Package. This package is only available when McLeodUSA provides services using its own local switching facilities (see 'Platform' in section 6.24C).

(M)

Business Package J - Preferred Advantage® Unlimited Highspeed

Business Package J consists of local line switched service, and a choice of any of the following features: Basic Voice Mail*, Call Waiting, Call Waiting ID, Caller ID Name and Number, Call Forward Variable, Call Forward Busy, Call Forward Don't Answer, Call Transfer, Anonymous Call Rejection, Call Screening, Continuous Redial, Basic Hunting, Last Call Return/Callback, Remote Access to Call Forward, Priority Call, Speed Call 30 and Three Way Calling. This package is only available when combined with the Unlimited Long Distance and Business ADSL service. No other long distance plans are available with this Business Package. This package is only available when McLeodUSA provides services using its own local switching facilities and where McLeodUSA offers DSL service (see 'Platform' in section 6.24C).

(T)

Local T1 Service

The Local T1 product provide high capacity local access services, with up to 24 channels. The T1 can be configured for either two-way trunk side service (Standard Trunks), or one-way DID (DID capable) service. When DID service is ordered, direct inward dialing (DID) numbers must be purchased from the Company. Rate elements are a Module Rate Element, a Local Distribution Channel Rate Element, Optional Elements, and applicable surcharges and taxes.

(T)

Dynamic T-1The Dynamic Local T1 product terminates into a customer-provided PBX or hybrid system, via a customer-provided DTI or channel bank. When DID/DOD service is ordered, direct inward dialing (DID) numbers must be purchased from the Company.

6.24 Local Business Services (cont'd)

A. Descriptions (cont'd)

Dynamic PRI

This product is a facility-based Local PRI product. It provides businesses advanced ISDN PRI capabilities for a variety of switched and dedicated communications applications. ISDN_PRI consists of twenty-three 64 Kbps B channels and one 64 Kbps D channel. The D channel is used for signaling and control of the B channels. Any spare bandwidth that is not used for voice trunks, can be used to provide point-to-point data products. The Dynamic PRI terminates into a customer-provided PBX or hybrid system, via a customer-provided Digital Trunk Interface (DTI) or channel bank. When DID/DOD service is ordered, direct inward dialing (DID) numbers must be purchased from the Company.

(M)

PRI

This product, ISDN-PRI, provides voice and data communications capabilities via a 1.544 Mbps central office termination and a 1.544 Mbps end user's premises. The product also provides high capacity local access services, with up to 24 channels of which 23 channels are 64 Kbps B channels and one channel is a D channel at 64 Kbps. The D channel is used for signaling and control of the B channels. When DID service is ordered, direct inward dialing (DID) numbers must be purchased from the Company. Rate elements are an ISDN Rate Element, a Local Distribution Channel Rate Element, Optional Elements, and applicable surcharges and taxes.

Calling Card

This service allows the Customer to make telephone calls from any non-Customer location such as a payphone by dialing an 800 access number and a personal identification number before dialing the telephone number of the called party. The charges resulting from use of the Calling Card are billed to the Customer's McLeodUSA account at the rates and charges set forth in the Rate Tables.

B. Rates

Rates for local service packages are provided in rate groups. A Rate Group is a group of central offices used to define tariffed pricing. All customers served using the same platform in a central office in the same Rate Group will receive the same tariffed pricing for local service. See section 6.24C for the Rate Group/CLLI Lists.

A Local Line Price Adjustment surcharge of \$6.00 is applied to each business local line that was established prior to June 13, 2005 and is serviced out of a Resale CLLI (see Section 6.24C).

Dedicated Local Preferred T1 Service - On-Switch Service

(M)

This service is intended to be utilized in conjunction with a customer-provided Private Branch Exchange (PBX) or similar system, utilizing a customer-provided DTI or channel bank. The service includes a digital T1 facility, local exchange switching and access to toll networks. Trunk signaling is done in-band. The customer shall be eligible for LD and Toll Free Plan w/ Local Access long distance rates on outbound toll services provided McLeodUSA. When Direct Inward Dial (DID) / Direct Outward Dial (DOD) service is ordered, DID numbers must be purchased from the Company. Where technically available, outbound calling ID number is a standard component of this service.

This service can be provided where necessary facilities are available on a minimum 12-month contract term, and with a minimum of 12 trunks required. Term and volume discounts may be available. Subsequent T1 facilities installed also require that minimum of 12 trunks be purchased on each facility. The customer can select from in-only, out-only or two-way communication trunks. Expedited service installation may be available for an additional fee, based on the agreement of the customer.

A Customer purchasing this service must represent to McLeodUSA that all traffic routed to McLeodUSA over the facilities will be traffic to which neither interstate nor intrastate access charges apply, according to the regulations of the FCC and the state PUC in the state to which the traffic will terminate. Each Customer subscribing to the service is required to periodically perform such traffic studies as are necessary to confirm this fact, and to immediately inform McLeodUSA if those studies do not confirm the fact.

A Customer subscribing to this service is also prohibited from stripping, changing, or in any way manipulating the telephone number of the calling party associated with each individual call, and to maintain call records showing the originating numbers for each call, to the extent those originating numbers are passed to Customer with the call.

Monthly recurring prices include up to 250 Direct Inward Dial (DID) numbers, with additional DID numbers in sequential blocks of 20 or non-sequential singles, at the Non-Recurring and Monthly Recurring rates below. Also included in the monthly recurring price are applicable End User Common Line (EUCL), Local Measured Service (LMS), Primary Interexchange Carrier Charges (PICC), and Mandatory Extended Area Service (EAS) charges.

<u>Miscellaneous</u>	<u>Non-Recurring</u>	<u>Monthly Recurring</u>
Change Order, per order	\$50.00	N/A
Conversion from T1 to PRI	Equal to Service Description Non-Recurring charge	

- Installation charges listed as Service Description “Non-Recurring” apply for each new T1 service configuration. If the customer were to change physical locations and need new service at the new location, these installation charges would also apply.
- Change Order charge applies for each change request submitted after installation of the service.
- Conversion of service charge from T1 to PRI applies when the facility type is changed to PRI. The charge is equivalent to the Installation Non-Recurring charge.
- Other state and federal taxes and regulatory surcharges are applicable and are to be billed separately.

Dedicated Local PRI Service On-Switch Service

This service is intended to be utilized in conjunction with a customer-provided Private Branch Exchange (PBX) or similar system, utilizing a customer-provided DTI or channel bank. The service includes a digital T1 facility, local exchange switching and access to toll networks. Trunk signaling is done out-of-band on a separate “D” channel, typically the 24th trunk on the digital T1 facility. The customer shall be eligible for LD and Toll Free Plan w/ Local Access long distance rates on outbound toll services provided McLeodUSA. When Direct Inward Dial (DID) / Direct Outward Dial (DOD) service is ordered, DID numbers must be purchased from the Company. Where technically available, inbound and outbound calling ID number is a standard component of this service.

Dedicated Local PRI Service On-Switch Service (cont'd)

(M)

This service can be provided where necessary facilities are available on a minimum 12-month contract term, and with a minimum of 12 trunks required. Term and volume discounts may be available. Subsequent T1 facilities installed also require that minimum of 12 trunks be purchased on each facility. The customer can select from in-only, out-only or two-way communication trunks. Expedited service installation may be available for an additional fee, based on the agreement of the customer.

Calling Party Name & Number is an included feature and allows the customer to receive this information from their call, assuming that their PBX system is capable of doing so, the calling ID party is served by a switch capable of passing that information, and the calling party has not blocked that information. This feature is offered where technically available

Call Transfer with Release is an included feature and allows the customer to transfer an inbound call on their PRI service to a person on an outbound trunk, then disconnect the call without the calling party and the party to which the call was transferred, being disconnected. This optimizes utilization on the customer PRI trunks. This feature is offered where technically available.

A Customer purchasing this service must represent to McLeodUSA that all traffic routed to McLeodUSA over the facilities will be traffic to which neither interstate nor intrastate access charges apply, according to the regulations of the FCC and the state PUC in the state to which the traffic will terminate. A Customer subscribing to this service is also prohibited from stripping, changing, or in any way manipulating the telephone number of the calling party associated with each individual call, and to maintain call records showing the originating numbers for each call, to the extent those originating numbers are passed to Customer with the call.

Monthly recurring prices include up to 250 Direct Inward Dial (DID) numbers, with additional DID numbers in sequential blocks of 20 or non-sequential singles, at the Non-Recurring and Monthly Recurring rates below. Also included in the monthly recurring price are applicable End User Common Line (EUCL), Local Measured Service (LMS), Primary Interexchange Carrier Charges (PICC), and Mandatory Extended Area Service (EAS) charges.

Conversion from T1 to PRI	Equal to Service Description Non-Recurring charge	

- Installation charges listed as Service Description “Non-Recurring” apply for each new PRI service configuration. If the customer were to change physical locations and need new service at the new location, these installation charges would also apply.
- Change Order charge applies for each change request submitted after installation of the service.
- Conversion of service charge from PRI to T1 applies when the facility type is changed to T1. The charge is equivalent to the Installation Non-Recurring charge.
- Other state and federal taxes and regulatory surcharges are applicable and are to be billed separately. (M)

Preferred AdvantageSM Integrated Access Trunk

(M)

The McLeodUSA Preferred Advantage Integrated Access (IA) Trunk solution is a full service communications product combining local voice and data over a single On-Switch T1 or PRI dedicated facility. The customer is eligible for LD and Toll Free Plan w/ Local Access pricing for calls carried by the same facility. An Integrated Access Device (IAD) will be placed at the customer's premise and allow for delivery and integration of each service to the end customer. The Base Package for this product is 6 voice lines plus 256K (4 channels) of High-Speed Internet access with 8 static IP addresses, of which 5 are usable. High Speed Internet, Secure Metro Connections (metro frame), or Secure City-to-City Connections (standard frame) can be added, in single channel (64K) increments to the base package. Pricing does not include the loop, port, or PVC charges associated with multi-node frame services. Additional IP addresses are available for an additional charge. This service is not offered on a month-to-month basis; the customer will be required to sign a contract with a term of at least 1 year to purchase the service.

For this product, no separate charges apply for and End User Common Line (EUCL) charge, Presubscribed Interexchange Carrier Charge (PICC), Local Measured Service (LMS), or mandatory Extended Area Service (EAS). Taxes and surcharges associated with E911 and universal service programs will be applied in addition to the rates in this section. Features will be available subject to technical requirements.

This product is available where McLeodUSA facilities permit. The customer must use IAD terminal equipment that will be owned and supplied by McLeodUSA at no additional charge to the customer. Basic managed services are provided at no additional cost to the customer. These are: proactive monitoring of the IAD, initial configuration assistance (not including LAN configuration settings), on-site replacement in case of equipment failure which is not the fault of the customer, and firmware upgrades as necessary. Other services may be provided at additional charge. McLeodUSA will maintain initial IAD customer configurations at the time of initial service turn-up, but will not capture or retain incremental configuration changes. If the customer voluntarily powers down the IAD, a technician may need to be dispatched and additional charges to the customer will result.

Additional voice and data channels can be added either at the time of installation or during the term of the Service Agreement, and added channels will have a term commitment that terminates at the same time as the Service Agreement. No more than 14 additional channels (13 additional channels if the facility is a PRI facility) can be added to a single base package. No more than 1 trunk group can be associated with a PRI facility, and no more than 7 trunk groups can be associated with a T1 facility.

All or part of nonrecurring charges for this product may be waived in the case of customers making a minimum term commitment of (1) year and taking into consideration the number of channels maintained by Customer. Customers may agree to additional pricing for inside wiring work. Term and volume discounts may also be applied.

Contract termination penalties as provided in the customer's Service Agreement will apply in the event that the customer does not maintain the Base Package for the term of the agreement. If the customer discontinues Integrated Access service with the company, McLeodUSA will retrieve the IAD and battery pack that had been deployed for the customer's use. The customer will incur additional charges in the event that the customer does not allow for the prompt retrieval of the IAD upon termination of service.

<u>Nonrecurring Charges</u>	<u>Term Length</u>		
	12 month	24 month	36 month

6.25 Preferred Advantage® Conference Calling (moved from Pages 61, 61.1, 102, 102.1, 102.2)

Effective January 1, 2009, these services are no longer available to new customers or to existing customers at new locations. Existing customers will be able to request changes to services, provided the request does not conflict with state rules, regulations or laws.

Conference Calling is the ability to have multiple parties listen and participate in meetings via telephone.

Anytime Conferencing

Anytime Conferencing Audio

Anytime Conferencing allows you to hold a conference call any time without operator assistance. Anytime Conferencing conference room is available 24/7 and can host up to 100 participants. Anytime Conference may be uses with the Web Conferencing interface Conference Calling Control Panel to moderate a call, show a Power Point® presentation or share documents in a fully collaborative environment.

Anytime Conferencing with Web

Anytime Conferencing Anytime Conferencing Web enables a caller to share presentations, applications and documents on the Internet with other participants.

Basic Assisted and Event Conferencing

Basic Assisted

Basic Assisted provides minimal operator support. Basic Assisted Conference call is ordered for less than 45 participants. A live operator will answer to both the call organizer and participants, gather each participant's name and other information required and announces each participant as s/he is placed into conference. The operator may conduct a roll call and then turn the call over to the Chairperson. The operator is always available by pressing 'star, zero' (*0).

6.0 Grandfathered Services/Products (cont'd)

6.25 Preferred Advantage® Conference Calling (cont'd) (M)

Event Conferencing

Event Conferencing is a professionally managed conference call, reserved in advance, and designed specifically for large event style conference calls or calls that require the personal touch of an operator.

Participants dial in from any location or the Event Conferencing team will dial out to participants. A dedicated operator manages the call from start to finish.

Standard Services available

With each of the two following standard services, clients have two options:

- Attended Call: Facilitator monitors the conference call to add any assistance that may be needed.
- Unattended Call: No facilitator is present, but a facilitator is available at any time by pressing *O on the phone.

Basic Assisted and Event Conferencing Products

Toll Free Meet Me

Participants call a pre-determined toll free number at a specified time. A conference call operator will greet the participants and ask for the name of the conference chairperson. Participants will be placed on music hold or into the open conference until all parties have arrived. Once all parties have arrived, the conference will be turned over to the chairperson. The conference fees are charged to the hosting organization.

Domestic Dial-Out

Conference Center facilitators dial-out to all participants prior to the scheduled conference. The hosting organization is charged the long distance and conference bridging fees.

Local Meet Me

Participants call a pre-determined toll free number at a specified time. A conference call operator will greet the participants and ask for the name of the conference chairperson. Participants will be placed on music hold or into the open conference until all parties have arrived. Once all parties have arrived, the conference will be turned over to the chairperson. Except for the LD toll charges, the conference fees are charged to the hosting organization. Each participant will be responsible for the long distance per minute charges that they incur while on the call.

Passcode

Passcode Conferencing provides an automated service that allows you to schedule a call in advance by a speaking to a reservationist. Each time a call is scheduled, a new access number and room number is provided to you.

6.26 Long Distance Interexchange and 800 Services (moved from Pages 62, 62.1, 84, 85, 85.1, 85.2, 85.3, 86, 86.1, 86.1.1, 87.2, 87.3)

Effective January 1, 2009, these services are no longer available to new customers or to existing customers at new locations. Existing customers will be able to request changes to services, provided the request does not conflict with state rules, regulations or laws.

A. Descriptions

(M)

McLeodUSA long distance services are interexchange telephone services that allow customers to originate and terminate interexchange calls at locations within the state of Idaho. A Customer must select McLeodUSA as their primary interexchange carrier for both Interstate and Intrastate long Distance. Usage charges are based on the duration and time of day of each call when applicable.

Where Customer's local service is provided by McLeodUSA, McLeodUSA offers reduced long distance pricing on a nondiscriminatory basis provided all Customer's local lines at a Customer location are served by McLeodUSA. Intrastate rates will be applied to any call record where the originating ANI is not provided by the customer or the originating carrier.

McLeodUSA 800 services are inward WATS services that permit intrastate calls to a customer's station in one location from stations in diverse geographical locations, and for which the McLeodUSA customer is billed for the calls rather than the call's originator. Unless otherwise specified, all McLeodUSA 800 calls are subject to a 30-second average connect time (i.e., total monthly minutes of use divided by total monthly calls must equal at least 30 seconds) for a given terminating service group. All calls are rounded up to the next higher increment. In the event that 800 calls do not meet the 30-second average connect time requirement, billable usage will be increased by a surcharge equal to the necessary number of minutes at the average cost per minute to meet the 30-second requirement. In addition, Customers may also order Originating ANI Sorting, which provides the Customer with a detailed monthly analysis of the originating telephone numbers of those placing 800 calls. A Customer must select McLeodUSA as their primary interexchange carrier for both Interstate and Intrastate long Distance. With the exception of Preferred Advantage® toll Free services, usage charges are based on the duration and time of day of each call when applicable.

Long Distance and Toll Free Packages consist of a bucket anytime minutes used by the Customer for outgoing domestic long distance calls. Long distance minutes used in excess of the bucket of minutes shall be billed at the "overage rate per minute."

Dedicated Select LD and Toll Free Plan provides dedicated inbound long distance services and outbound 1+ long distance services for business customers that bill over 50,000 minutes of long distance usage (i.e., both inbound and outbound Long Distance) per month per DAL from McLeodUSA. A direct connection must be established with the McLeodUSA network via a Dedicated Access Line (DAL). Any McLeodUSA business customer that has a DAL has 3 months to "ramp up" their monthly DAL usage to 50,000 minutes per month per DAL. Beginning the fourth month of billing the customer will be assessed a \$500 shortfall charge per DAL if the customer does not bill more than 50,000 minutes per month per DAL from McLeodUSA

A. Descriptions (cont'd)

(M)

LD and Toll Free Plan w/o Local Access and LD and Toll Free Plan w/ Local Access provide switched inbound and outbound 1+ long distance services for Business Customers.

LD and Toll Free Select Plan w/o Local Access and LD and Toll Free Select Plan w/ Local Access provide switched inbound and outbound 1+ long distance to business customers with at least \$50.00 estimated monthly usage for long distance and toll free services, including conference calling, calling card and international long distance usage.

Unlimited Long Distance provides switched outbound 1+ long distance in an unlimited minute usage to domestic and Canadian terminations per ANI per month. No auto-dialers, modems or call generation equipment of any kind is permitted. A threshold of 3,000 maximum minutes per ANI per month will be treated as an indication of call generation equipment usage. Usage that exceeds 3,000 minutes per ANI per month will be billed at \$0.12 per minute for all minutes that exceed the 3,000 minute threshold. Call details for minutes that exceed the 3,000 minute threshold will appear on the monthly invoice, and the customer may request the call detail for the minutes that fall below the 3,000 minute threshold. This package is only available when combined with the Preferred Advantage Unlimited package. No other local packages are available with the Unlimited Long Distance plan. This plan is only available when McLeodUSA provides services using its own local switching facilities.

B. Rates

McLeodUSA long distance services are interexchange telephone services that allow customers to originate calls from their telephone line and terminate calls to domestic (intrastate and interstate) and international points. All long distance calls will be recorded and all calls billed using the Overage Rate minutes will be billed in 6 second increments for business customers. All residential long distance calls will be recorded and billed in one-minute increments. All lines at a customer location must be PIC'd to McLeodUSA for long distance service. Intrastate rates will be applied to any call record where the originating ANI is not provided by the customer or the originating carrier.

The long distance service minutes included in the Long Distance and Toll Free plans apply to domestic intrastate calls, domestic interstate, extended calls (Alaska and Hawaii), NANP calls and to international calls as specified by McLeodUSA pursuant to federal regulation. All lines at a customer location must be PIC'd to McLeodUSA for long distance service package.

B. Rates (cont'd)

Dedicated Select LD and Toll Free Plan provides dedicated inbound long distance services and outbound 1+ long distance services for business customers that bill over 50,000 minutes of long distance usage (i.e., both inbound and outbound Long Distance) per month per DAL from McLeodUSA. A direct connection must be established with the McLeodUSA network via a Dedicated Access Line (DAL). Any McLeodUSA business customer that has a DAL has 3 months to "ramp up" their monthly DAL usage to 50,000 minutes per month per DAL. Beginning the fourth month of billing the customer will be assessed a \$500 shortfall charge per DAL if the customer does not bill more than 50,000 minutes per month per DAL from McLeodUSA.

LD and Toll Free Plan w/o Local Access and LD and Toll Free Plan w/ Local Access provide switched inbound and outbound 1+ long distance services for Business Customers.

LD and Toll Free Select Plan w/o Local Access and LD and Toll Free Select Plan w/ Local Access provide switched inbound and outbound 1+ long distance to business customers with at least \$50.00 estimated monthly usage for long distance and toll free services, including conference calling, calling card and international long distance usage. A "LD Shortfall Charge" equal to the difference between actual usage and \$50.00 will be assessed monthly, if applicable.

A monthly recurring \$1.00 Toll Free Fee will be applied to each Toll Free number that is active in the McLeodUSA Respong at the time of invoicing.

Business Long Distance Packages and Overage Rates for Customers with Local Service Provided by McLeodUSA.

This service is available to Customers that purchase a bundled package of local and long distance voice service for a Customer's physical location at which local service is provided by McLeodUSA for all local lines at that location. All lines at the location must be PIC'ed to McLeodUSA for both interLata and intraLata services.

Business Preferred Advantage SM Long Distance with Local	Monthly Rate	Overage Rate/Minute
Unlimited Long Distance	**	\$0.120

** The monthly rate for the Unlimited Long Distance is included in the rates for the Preferred Advantage Unlimited or Preferred Advantage Unlimited Highspeed packages. (See section 6.24.)

B. Rates (cont'd)

Dedicated Select LD and Toll Free Plan

(M)

This service is available to business customers that bill over 50,000 minutes of long distance usage per month (*i.e.*, both inbound and outbound Long Distance) from McLeodUSA. A direct connection with the McLeodUSA network via a Dedicated Access Line (DAL) is required. DALs are either connected to a McLeodUSA switch or provided via an alternative vendor. This service can be provided where necessary facilities are available. This product is available for multiple locations, however, the monthly rates may vary due to state locations. Pricing is based on per minute rates that incorporate the origination, transport and final termination of the customer's call. Calls are billed in 6-second increments, with a 6-second minimum. Customer has 3 months from the time of the DAL turn up to ramp up to 50,000 minutes per month usage on that DAL. After that period, Customer will be subject to a charge of \$500 in any month in which Customer's total monthly long distance usage is less than 50,000 minutes. A recurring charge will also be assessed for the DAL circuit. Intrastate rates will be applied to any call record where the originating ANI is not provided by the customer or originating carrier. Long Distance rates for Dedicated Select LD and Toll Free Plan long distance service require that a customer maintain an acceptable traffic distribution on its outgoing and incoming Long Distance calls. The total minutes of Long Distance calls must originate or terminate at least 80% of the time from or to end user customers located in a local exchange in which a Regional Bell Operating Company ("RBOC") is the incumbent Local provider. McLeodUSA has the right to switch customer to a different LD plan and provide service on a month-to-month arrangement when any customer's Long Distance terminates less than 80% of the time to a LEC providing local service in an RBOC exchange. The toll free service is not available for any locations outside of the continental United States. Tailored Call Coverage and Route Overflow are available features. Account Codes are available to provide customers auditing functionality for all long distance calls.

Per Minute Usage Rate LD: \$0.0462
Per Minute Usage Rate Toll Free: \$0.0788

LD and Toll Free Plan w/o Local Access and LD and Toll Free Plan w/ Local Access (M)

Intrastate rates will be applied to any call record where the originating ANI is not provided by the customer or the originating carrier. Long Distance rates for LD and Toll Free Plan w/o Local Access and LD and Toll Free Plan w/ Local Access service require that a customer maintain an acceptable traffic distribution on its outgoing and incoming Long Distance calls. The total minutes of Long Distance calls must originate or terminate at least 80% of the time from or to end user customers located in a local exchange in which a Regional Bell Operating Company ("RBOC") is the incumbent Local provider. McLeodUSA has the right to switch customer to a different LD plan and provide service on a month-to-month arrangement when any customer's Long Distance terminates less than 80% of the time to a LEC providing local service in an RBOC exchange.

The toll free service is not available for any locations outside of the continental United States. All incoming toll free calls will be rounded and billed in 6-second increments. Toll Free features include: listing of Customer's toll free number in the national Toll Free directory service; message referral that provides a disconnect or referral message on the toll free number; ability to restrict areas of service; geographical routing that permits multiple destinations of Toll Free based on NPA of the caller; time routing that permits customer to set multiple destination numbers based on time specifications; percent allocation routing that permits routing of calls to multiple destinations based on a percentage distribution; and route advance overflow that allow for a secondary target termination for overflow.

Customers w/o Local Access

This service is available to business customers that do not purchase a bundled package of local and long distance service from McLeodUSA.

Per Minute Usage Rate LD: \$0.0560
Per Minute Usage Rate Toll Free: \$0.1599

Customers w/ Local Access

This service is available to a Customer that purchases a bundled package of local and long distance voice service for all lines at a Customer physical location.

LD and Toll Free Select Plan w/o Local Access and LD and Toll Free Select Plan w/ Local Access (M)

This is a switched outbound 1+ long distance service for business customers with at least \$50.00 estimated monthly usage for long distance and toll free services, including conference calling usage, calling card usage and international long distance usage. For every month in which Customer's actual long distance and toll free usage charges, including conference calling, calling card and international long distance, is less than \$50.00, Customer will be assessed a "LD Promo Shortfall Charge" equal to the difference between actual usage and \$50.00.

Long Distance rates for LD and Toll Free Select Plan w/o Local Access and LD and Toll Free Select Plan w/ Local Access service require that a customer maintain an acceptable traffic distribution on its outgoing and incoming Long Distance calls. The total minutes of Long Distance calls must originate or terminate at least 80% of the time from or to end user customers located in a local exchange in which a Regional Bell Operating Company ("RBOC") is the incumbent Local provider. McLeodUSA has the right to switch customer to a different LD plan and provide service on a month-to-month arrangement when any customer's Long Distance terminates less than 80% of the time to a LEC providing local service in an RBOC exchange.

7.0 Wholesale Services

Boise, Idaho

(M)

7.1 Wholesale Service Order Processing:

A Wholesale Service Order charge applies to all providers of telecommunications services that assess a non-recurring charge on McLeodUSA for the processing of comparable orders submitted by McLeodUSA to initiate service using network elements leased from the incumbent local exchange carrier ("ILEC"). A Requesting Carrier may submit an LSR during regular business hours of McLeodUSA. One LSR must be submitted for each retail end user switching from McLeodUSA to the Requesting Carrier. McLeodUSA will process an LSR and return a firm order commitment (FOC) to the requesting carrier within 48 hours of receipt. A Wholesale Service Order Charge shall be charged for each LSR received, whether accepted as valid or rejected as invalid. LSRs may be rejected for inaccurate, incomplete, or repetitive LSRs. An additional Service Order Charge applies when the Requesting Carrier cancels an LSR request. A separate Service Order Supplemental Charge applies when a Requesting Carrier submits an LSR that modifies or supplements the initial LSR. A Requesting Carrier may request expedited processing of the LSR within 24 hours for an additional Expedite Fee. A Forced Expedite Fee applies if the Requesting Carrier converts a retail customer's service before the Firm Order Commitment Date that causes McLeodUSA to expedite its required activities. An additional charge also applies to an LSR Expedite Order that involves a loop disconnect. A full set of Business Rules is available from McLeodUSA.

7.1.1 Rates:

The Wholesale Service Order charge is equal to the Service Order Charge (or a comparable charge assessed upon receipt of an order) contained in the ICA between McLeodUSA and the incumbent local exchange carrier for the state in which the retail end user resides.

If the ICA does not set forth non-recurring charges identified as a Service Order Charge, Service Order Supplemental Charge, Expedite Fee, or Forced Expedite Fee charge, or comparable items, the following charges apply:

Wholesale Service Order	\$20
Service Order Supplemental Charge	\$15
Expedite Fee*	\$40
Forced Expedite Fee*	\$75

For Expedite or Forced Expedite Request involving Loop Disconnect, the applicable charge applies in addition to a pass through of any monthly recurring charges for an unbundled loop charged by the ILEC after Customer conversion to Requesting Carrier's service.

(M)
