TARIFF FORMAT

- A. Sheet Numbering** - Sheet numbers appear in the upper right corner of the sheet. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 13 and 14 would be 13.1.
- B. Sheet Revision Numbers** - Sheet Revision Numbers also appear in the upper right corner of each sheet. These numbers are used to determine the most current sheet version on file with the Commission. Consult the Check Sheet for the sheet currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
 - 2
 - 2.1
 - 2.1.1
 - 2.1.1.A
 - 2.1.1.A.1
 - 2.1.1.A.1.(a)
 - 2.1.1.A.1.(a).I
 - 2.1.1.A.1.(a).I.(i)
 - 2.1.1.A.1.(a).I.(i).(1)
- D. Check Sheets** - When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff with a cross-reference to the current revision number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some sheets). The Tariff user should refer to the latest Check Sheet to find if a particular sheet is the most current on file with the Commission.

- (b) Residential Toll Free Service is a presubscribed switched access service, offering users inbound, toll free long distance telecommunications services from points originating and terminating within the State of Idaho. This service enables the caller to contact the Customer toll free, through the use of a special "800" or "888" number. Access may be provided by the Company, or the Customer may utilize local exchange Company access.
- (c) Calling Card Service enables subscribers to place calls from locations other than their presubscribed call locations. Subscribers are billed on a monthly basis at the Company's tariffed rates.
- (d) Directory Assistance is provided by Windstream Communications, Inc.'s underlying carrier to subscribers of record. The Customer may access the underlying carrier's Directory Assistance by dialing the area code plus 555-1212. The Customer will be billed for such service by Windstream Communications, Inc.
- (e) Prepaid Calling Card Service The prepaid calling cards are available in various denominations of units as specified by the Company. The prices are inclusive of all taxes. Prepaid calling cards will be sold at prices rounded to the nearest cent. The customer dials the toll-free number listed on the card and is prompted to enter the personal identification number (PIN) listed on the back of the card. The card balance, in dollars and cents, will be announced at the beginning of each call. When the card balance nears zero during a call, an automated voice announces the remaining time to the customer. Calls are automatically disconnected after the card balance reaches zero.
- (f) Residential Account Code Service is an optional service for direct dialed intrastate and/or interstate long distance calls that offers customers a way to track long distance usage. This Service allows customers the ability to have calls separated and displayed on their telephone bill. Account Code Service requires callers to enter a unique code for completion of a long distance call. The Company's network will authorize calls only if the unique code is entered. This service is offered where technically available.
