### **PRICE LIST FORMAT**

A. Page Numbering - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new sheets are occasionally added to the Price List. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.

B. Page Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the IPSC. For example, the 4th revised Page 14 cancels the 3rd revised Page 14.

C. Paragraph Numbering Sequence - There are seven levels of paragraph coding. Each level of coding is subservient to its next higher level:

1.1

1.2

2.1

2.2

D. Check Sheets - When a Price List filing is made with the IPSC, an updated Check Sheet accompanies the Price List filing. The Check Sheet lists the sheets contained in the Price List, with a cross reference to the current revision number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some sheets.)
