TARIFF FORMAT SHEET

- A. Page Numbering. Page numbers appear in the upper-right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added, the page appears as a decimal. For example, a new page added between pages 34 and 35 would be 34. 1.
- B. Page Revision Numbers. Revision numbers also appear in the upper-right corner of the page. These numbers are used to determine the most current page version on file with the Idaho Public Utilities Commission. For example, the 4th revised Page 34 cancels the third revised Page 34. Because of deferrals, notice periods etc., the most current page number on file with the Commission is not always the tariff page in effect. Subscriber should consult the check page for the page currently in effect.
- C. Paragraph Numbering Sequence. There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level of coding.
- 2.
  - 2.1.
  - 2.1.1.
  - 2. 1. 1.A.
  - 2.1. 1. A. 1.
  - 2.1. 1. A. 1. (a)
  - 2.1.1.A.1.(a).I
  - 2.1. 1 A. 1 (a). 1. (i)
  - 2.1. 1 .A. 1.(a).1 (i) (1)
- D. Check List of Effective Pages. When a tariff filing is made with the Commission, an updated Check List of Effective Pages ("Check List") accompanies the tariff filing. The Check List lists the pages contained in the tariff, with a cross reference to the current revision number. When new pages are added, the Check List is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on the Check List if these are the only changes made to it (i.e., the format, etc.). The subscriber should refer to the latest Check List to find out if a particular page is the most current page on file with the Commission.
