Idaho Power contract with Dynamis terminated

The Idaho Public Utilities Commission has approved a settlement that terminates a power purchase agreement between Idaho Power Company and Dynamis Energy LLC.

In February 2012, the commission approved a sales agreement under which Dynamis would sell the output of a 22-megawatt landfill waste-to-energy facility to Idaho Power. The facility was to have been located at the Ada County landfill near Boise.

Under the settlement, Idaho Power retains an undisclosed portion of Dynamis' security deposit as damages while returning the balance to Dynamis. The settlement also resolves the matter without litigation, the commission noted, conserving both time and expense.

The project was to have been online by Feb. 15, 2014.
